Online Bill Pay:

Access your Shelby Energy account
through our website at
www.shelbyenergy.com.

Click on "Online Bill Pay" to view your
electric bill and make payments by debit
card, e-check, Visa, or Mastercard.

All members signing up for new service
with Shelby Energy receive a short survey.
Members who return the completed survey
to Shelby Energy are automatically eligible
to win a one-time \$20 credit on their elec-
tric bill. Each month, one name is drawn
and a lucky Shelby Energy member receives
a bill credit on their next statement.

The new member survey winner for February 2018
is Toby Epple of Shelbyville, KY.

May is National Electrical Safety Month

At Shelby Energy, electrical safety is our first priority

The electrical power that Shelby Energy provides is a great resource, but it must also be respected. What changes our lives for the better could, in an instant, change our lives for the worse.

Electrical problems cause thousands of fires nationwide each year, resulting in hundreds of deaths. In addition, electrical shock injures and kills many people on an annual basis. Most of these deaths could be avoided with an increased awareness.

May is National Electrical Safety Month, and a good time to talk about the steps Shelby Energy takes year-round to raise safety awareness.

Few people are more aware of electricity's potential dangers than those that work at Shelby Energy. Our line technicians climb poles and work from bucket trucks in all kinds of weather, at all hours of the day or night, to make sure your homes or businesses have reliable service.

We're concerned about more than just our employees. Shelby Energy's

representatives visit schools and civic groups to provide free safety presentations. Young children learn about basic safety around wall sockets and appliances, while older children and adults receive vital safety information regarding various indoor and outdoor activities. Live demonstrations and discussions make it more personal and help drive the safety message home.

Shelby Energy provides a safety trailer for outdoor demonstrations at scheduled events in the communities we serve. This is an exciting presentation about how electricity travels through wires and it communicates the dangers of electricity, such as when a kite hits a power line. Our safety education programs are free, and if you wish to host a safety program at your school or civic group, call us at (800) 292-6585.

At Shelby Energy we work with electricity every day, and that is why safety is our number one goal.

**Shelby Energy will be closed
in observance of Memorial Day
on Monday, May 28.**

**In the event of an emergency or outage,
please call (800) 292-6585.**

Don't forget: Annual A/C maintenance is due

Every spring, before the weather gets too warm, call a qualified service technician to inspect and tune-up your air conditioning unit.

During this annual maintenance visit, the tech will be able to evaluate your A/C and inform you of necessary repairs. If the unit is old, the service technician might recommend that you replace it.

In addition, you can do two things on your own to make sure your A/C stays in good working order:

1. Clean or replace the air conditioner filter. If you have a reusable filter, wash it and dry it every month during the summer. If you have a disposable filter, replace it. A dirty filter can get clogged with dust and dirt and restrict the air flow. This will make your system work extra-hard to cool your house, which wastes energy and can drive up your electric bill. A dirty filter can push dust back into the home, which makes

the air less healthy, especially for someone that has allergies or asthma.

2. Keep the area around the outside of the air conditioner unit clean.

Remove dirt, grass and any debris that have collected so they don't restrict its

air flow. Trim shrubs away so they can't touch the unit.

You should also rinse your unit every now and then—but shut off the power to the unit first, and never use a power washer to clean the outdoor unit.

NRECA

Stay Clear!

Contact with downed power lines could cause injury or death.

If you see downed lines, call 911 and your electric company.

Stay away until help arrives.
